Cover Letter

Dear Recruiter,

I believe that I would be a great fit at Intermountain because while I do not have a lot of experience directly in web development, I'm a fast learner and already have experience working professionally in software development. Furthermore, not only do I have experience in industry, I am an extremely fast learner and will be able to learn whatever framework Intermountain needs me to learn and learn it quickly. When I started my internship this semester at General Atomics, I was familiar with C# slightly due to my experience in C++ and Java; however, aside from that, I was completely inexperienced when it came to .NET. However, I was quickly able to familiarize myself with C#, learn TFS version control, and learn how to use .NET to simulate user interaction very quickly to become one of the top contributors on my team.

If you believe that I am a good match for your company or have any questions about my credentials, please contact me at your earliest convenience. I thank you for your time and for your consideration of my credentials.

Sincerely yours,

Dyllon Gagnier
